

FLOWCHART LAND COVER CHANGE MONITORING

Description :

This flowchart illustrates the workflow for monitoring and verifying deforestation alerts within the KPN Plantation concession area. It aims to conduct monitoring every 2 weeks as well as incidental events.

Legal Basis :

- UU No. 41/1999 on Forestry** : Prohibits land clearing without permits in forest areas and mandates forest protection.
- UU No. 32 / 2009 on Environmental Protection and Management** : Requires businesses to prevent and restore environmental damage, including through monitoring systems.
- UU No. 39 / 2014 on Plantations** : Article 55: Plantation business activities must comply with sustainable principles and be environmentally responsible.
- PP No. 22 / 2021 on Environmental Protection and Management**: Includes provisions for environmental risk analysis and technology-based monitoring.
- Permen LHK No. P.8/MENLHK/SETJEN/KUM.1/3/2019** : Procedures for handling environmental information, including the use of remote sensing data.
- ISPO (Indonesian Sustainable Palm Oil)** : Obligated to avoid deforestation and ensure protection of high conservation value areas.
- NDPE Policy KPN Plantations (No Deforestation, No Peat, No Exploitation)** : Regulates forest and peat protection after 2015.
- EU Deforestation Regulation (EUDR)** : Ensures supply chain traceability and proof of deforestation-free since 2020.

** Minimum once a month, may be conducted more than once if needed.
